

Goldman Sachs (Experience Md. Adil)

Round 1

Aptitude Round – 66 questions (usually may be more)

This includes questions from English, quantitative analysis, and numerical-based (time, distance, clock questions). Don't invest too much time learning aptitude if you practice for 2 hours daily, mid-level questions, then you will also pass and leave the rest to luck. P.S. _ You need to sit for other companies too.)

The result is usually published after 1 month. If you are shortlisted.

Sessions

An online session, just like a webinar, is conducted, which you need to attend, where they usually talk about Next JS and its uses. They also provide you with resources that you might need in the coding rounds.

Coding Rounds

This round is usually just like normal Online Assessment (OA) rounds. (Questions from DP, Recursion-based questions, CS Fundamentals- Industry Standards must know like DBMS, OOPS, CN (not too much asked)).

If you are shortlisted, then after 1 month, you will receive links for the Interview Rounds.

Interview Rounds (Usually 3, maybe 4 based on performance)

1st Round (DSA Round): 1 – 2 questions (usually Leetcode medium-based and Striver's Sheet fundamental type)

2nd Round – DSA questions, projects, other mentioned skill set or projects from the resume may be asked. (They do not focus on the project too much, usually.)

3rd Round – Unexpected conducted by senior leaders of the Company may be DSA-type questions, projects, Cs fundamentals, aptitude or anything else (like - thought process, why applied, HR type questions in case of Md. Adil Da).

The final result will be published then.
