JP Morgan Chase & Co.

Code For Good – Internship Acceptance Guide

A complete guide for aspiring interns

01 About The Company

JPMorgan Chase & Co. is one of the world's largest financial institutions with over 200 years of history, headquartered in New York City and operating in more than 100 countries. With assets exceeding \$3.9 trillion, it ranks as the largest bank in the United States. JPMC invests over \$15 billion annually in technology and employs more than 60,000 technologists globally, pioneering innovations in AI, cloud computing, and cybersecurity.

Code For Good (CFG) is JPMC's flagship hackathon-based internship program. It brings together talented students to build technology solutions for nonprofit organisations — creating real-world impact while showcasing technical abilities, teamwork, and leadership. Excelling at CFG is the primary pathway to securing a Software Engineer (SWE) internship at JPMC.

CTC : 19.75 LPA

Base : 13 LPA

02 Process Of Hiring

The flowchart below outlines the complete step-by-step hiring process for the JPMC Code For Good Internship Program.

03 Student's Experience & Suggestions

1

Anubhab Bhattacharya
Computer Science & Engineering

Name	Anubhab Bhattacharya
Department	Computer Science & Engineering
Year of Grad.	2027

Experience

Online Assessment: 2 LeetCode Medium questions on HackerRank — one on rotating a matrix by certain degrees, and another of Medium-Hard difficulty.

HireVue Interview: Behavioural questions focused on teamwork and completing tasks for the team.

Code For Good Hackathon (On-Site): Held at the JPMC office as a 24-hour hackathon. Teams were given problem statements from NGOs. Although the team did not win, overall performance was continuously evaluated by mentors throughout the 24-hour process.

Prep. Tips

DSA and Web Development are sufficient for the OA and hackathon. The tech stack may vary depending on the team you are allotted, so be flexible and ready to adapt quickly.

Addit. Notes

Believe in God's plan — things will work out.

2

MD Touseef Alam
Information Technology

Name	Md. Touseef Alam
Department	Information Technology
Year of Grad.	2027

Experience

Online Assessment (HackerRank – End of March): 2 Easy-to-Medium DSA questions in 60 minutes. Q1 involved rotating a matrix by multiples of 90°. Q2 was a string-based greedy problem.

HireVue Interview (First week of April): Automated behavioral round — 2 questions, 30 sec to prepare, up to 3 min to record each answer. Questions: *"How would you learn something new?"* and *"Tell about instances where you followed ethics."*

Note: Selected candidates are informed about the hackathon by end of May. JPMC conducts a pre-hackathon bootcamp series via Zoom webinars hosted by employees.

Code For Good Hackathon (June–July, Bengaluru): 24-hour on-site hackathon. Team of 7; 4 NGO problem statements presented. Two mentors assigned initially, replaced by a Senior VP at 2 AM. Team won — each member received an iPad, Apple Pencil, and a winning certificate!

Prep. Tips

DSA: LeetCode Easy-to-Medium is sufficient. Strong grasp of basic data structures is enough.

HireVue: Communication and clarity of thought matter most. Be confident and fluent.

Hackathon: Technical skills have already been assessed. Mentors evaluate collaboration, leadership, initiative, team spirit, and presentation skills. Winning is a bonus — selection depends heavily on the mentor's review.

Addit. Notes

Be open with your mentors — don't treat them as just evaluators. Ask them about their career path, work-life balance, and what keeps them motivated. These conversations build rapport and leave a lasting impression. Mentors observe how you work with others, lead, and communicate.

✓ **Selected**

Name	Vidhi Mantry
Department	Information Technology
Year of Grad.	2027

Experience

Online Coding Assessment (HackerRank): 2 algorithmic problems in 45 minutes — Easy/Medium LeetCode style. One question involved rotating a matrix at 90°, 180°, and 270°; the other was a medium-level string problem.

HireVue Video Interview (Behavioral): Automated video round on the HireVue platform. 2 HR-type behavioral questions. 30 seconds to prepare; 2 minutes to record each answer.

Code For Good Hackathon (24-hour, on-site, Bangalore): Teams of 6–7 students, each assigned 2–4 JPMC mentors. Goal: build a technical solution for a nonprofit organization. Teamwork and collaboration were key evaluation criteria.

Prep. Tips

OA: Strong core DSA fundamentals and timed practice. JPMC has a high CGPA cut-off (~8.5+).

HireVue: Be confident; ensure a quiet place with proper lighting.

Hackathon: Sharpen dev or ML skills; be proactive — engage with your team and mentors, suggest ideas, divide tasks well. The internship/FTE offer depends entirely on your mentor's review. Stay calm and enjoy the experience!
